

Hello everyone, so glad you have visited my website.

I find that I can upload PDF documents but I am unable to password protect them.

I don't want the documents to be available to the general public, so I am not going to make them available freely available on my website BUT

should you wish to receive a copy, then please feel free to contact me via the website 'Contact Me' page and I will gladly email a copy of the handouts to you.

If you could just tell me the name of the ship we were on and the embarkation port then I will know that you are from the cruise and not just a member of the general public trying to obtain my work.

If you could also let me know which documents you would like (or all of them), then I will send them to you asap.

Available are:

Getting Started in Manual Mode

Diagram of the Exposure Triangle

Editing photographs in Lightroom - my workflow.

My Top tips for photographers

Example of Hyperfocal Distance in use via a graphic

Hyperfocal Distance tables

Starter setting for taking photographs of the Aurora Borealis

If you find that you have any follow-up questions, then again, please feel free to ask me via the 'Contact Me' page and I will get back to you as soon as I can.

PRINTING - the company that create prints via my website is:

<https://www.onevisionimaging.com>

I'd like to take this opportunity to say thank you for your support whilst travelling with Cruise & Maritime - I can assure you that it was very much appreciated.

Thanks and regards,
Sue Leonard, LRPS
